

My Minecraft World

Bleary-eyed, I went downstairs for breakfast. The house was empty. Even the furniture had gone.

But I had just woken up and was I seeing things. It was all normal. I decided to have my breakfast and then go onto Minecraft. Once I was on Minecraft, I decided to load a new world.

As soon as I loaded my new world I collected some wood, made a crafting table, and quickly got some tools. Then I dug underground, got some stone, and made stone tools.

So made a furnace then decided to kill some mobs and get meat. I cooked it in the roaring heat of the furnace and set off to find a cave. I came across a dark, wet, gloomy cave and found some iron ore.... Just what I was looking for!

I also came across some coal and quickly mined it with a stone pickaxe. After mining the coal, I went over to the iron ore and mined it and I gathered it and put it straight in the furnace .

I took the iron out of the furnace and crafted some iron tools and iron armor. Now I was ready to go mining deeper into the caves and ready to fight hostile mobs. So, I set off into the depths of the cave and went to coordinates' y 11. Then I immediately started mining through the stone walls and looking for diamonds. I found a vein of 7 diamonds and urgently mined them. Now it was time for school, so I went off thinking about my world on Minecraft the whole day. As soon as I got home, I hopped back onto Minecraft.

I got on and used my Diamonds to craft diamond tools and diamond armor. I had just realized that there was a vein of nine diamonds behind me and I was very shocked to see. I used my iron pickaxe once again to mine that vein of nine diamonds and once I got the diamonds, I made an enchanting table and a jukebox .

Then I went to the surface and found a village, quickly looted it, and traded 3 emeralds for a traveler's map from a villager. I saw a stronghold on the map, so I went to it. Once I was above it I dug straight down and I found the stronghold. I looked for the end portal , found it and I realized I had eight Obsidian and Flint and steel in my inventory, so I quickly made a nether portal and went in.

When I was in, I saw a nether fortress right on my left but I realized I had gold in my inventory as well, so I traded with the piglins and got 12 ender pearls. I went to the nether fortress and found a blaze spawner .I killed a bunch of blazes and got blaze rods , then I returned to my portal and went back to the stronghold. I turned my blaze rods into blaze powder and used the powder to make my 12 enderpearls into 12 eyes of ender. I put in the 12 eyes of ender and jumped in.

Now I was in the end and quickly crafted a few beds. Once the Enderdragon had perched I put the beds underneath him and slept .Next minute the beds exploded and dealt damage to the Enderdragon. I laid down my enchanting table , used some Lapis Lazuli to enchant my armor and diamond tools and went up to the Ender Dragon , attacked it with force and killed it .
